

/home/herik/CPPWebFramework  
/CPPWebFramework/cwf/cstlcompilerobject.h

```
graph BT; A["/home/herik/CPPWebFramework  
/CPPWebFramework/cwf/cstlcompiler.cpp"] --> B["/home/herik/CPPWebFramework  
/CPPWebFramework/cwf/cstlcompilerobject.h"]; C["/home/herik/CPPWebFramework  
/CPPWebFramework/cwf/cstlcompilerobject.cpp"] --> B;
```

The diagram illustrates the relationship between three files in a project. At the top is a header file, `/home/herik/CPPWebFramework/CPPWebFramework/cwf/cstlcompilerobject.h`, which is shaded gray. Below it are two source files: `/home/herik/CPPWebFramework/CPPWebFramework/cwf/cstlcompiler.cpp` on the left and `/home/herik/CPPWebFramework/CPPWebFramework/cwf/cstlcompilerobject.cpp` on the right. Blue arrows point from each source file to the header file, indicating that both source files include this header.
